DETAILED ACTION***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a subcombinational bulk material baler, classified in class 100, subclass 76.
- II. Claims 3-9, drawn to a subcombinational bulk material baler including a plurality of support head assemblies, classified in class 100, subclass 8.
- III. Claims 10-15, 23-24 drawn to a subcombinational bulk material baler including at least one pair of strap drive wheels, classified in class 100, subclass 3.
- IV. Claims 16-22, drawn to a bulk material baler combination, classified in class 100, subclass 29.

Inventions are separable and distinct for the following reasons:

Inventions of Group IV and Groups I-III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as evidenced by claim 16.

Inventions of Groups I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions of Groups I-III have separate utility such as

use for baling or strapping material and are not limited to the particulars of the combination, claim 16. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shelley Self whose telephone number is 703-305-5299.
